

TWS Operation Dashboard UI

The image shows a wireframe of a login page. It consists of a large light gray rectangle representing the page background. Inside this rectangle is a smaller white rectangle representing the login form. The form has a title 'Sign In' at the top. Below the title are two input fields: one for 'Username' and one for 'Password'. To the right of the password field is a link labeled 'Forget?'. At the bottom of the form is a button labeled 'Sign In'.

- This is the login page; we need to sign in using our User name and Password

- Immediately after logging in, we enter the Home page, where we can monitor the Performance, Total Transactions, Total Withdrawal and Total Shortage of all Projects, as well as the number of Users.
- Also, using the filter provided above, we can get only the data required for the desired project, not only that, we can also filter the required date range.

- This is the user management page and contains all the data related to each user; and we can also easily find the user we want by applying filters.

- This is the main page of our site and all performance of the user can be monitored from this page, we can go to this page by selecting the User we want from the User management page above and clicking action button.
- We can also use filters to get the data for the time period we want.

- After user management, we have the Transaction page, and under the transaction, 3 projects have been included and within those 3 projects a drop-down application has been provided to check the order report and shortage report related ton each project

The flow chart for the site is shown above.
